Startup Evaluation Report

tea

Overall Confidence Score: 40.88/100

Executive Summary

This report presents a deterministic, explainable evaluation based on the submitted startup information. It is a decision-support tool, not a prediction of business success.

Confidence Scores

Metric	Score	Reasoning
Business Model	40.00	Scores how clearly value delivery and revenue capture are described.
Financial Feasibility	100.00	Scores the presence of budget and revenue assumptions, not projected profitability.
Innovation	31.00	Scores solution specificity and explicitly stated differentiation.
Investment Readiness	31.00	Scores evidence readiness for an investor conversation, not funding eligibility.
Market Opportunity	21.00	Scores clarity of the customer segment and problem evidence; it does not estimate external market size.
Risk Resilience	45.00	Scores whether known risks and competitive context have been considered.
Scalability	35.00	Scores stated repeatability, digital leverage, and execution maturity.
Technical Feasibility	32.00	Scores current validation stage and solution implementation detail.

SWOT Analysis

{'threats': ['Customers may continue using known alternatives.'], 'strengths': ['Clearly stated customer problem.', 'Defined target audience.'], 'weaknesses': ['Submitted assumptions require customer validation.'], 'opportunities': ['Test demand within Other in Sri Lanka.']}

Business Model Canvas

{'channels': 'Validate acquisition channels through experiments.', 'key_partners': 'Distribution partners, domain experts, and technology providers.', 'key_resources': 'Customer insight, product capability, and domain knowledge.', 'cost_structure': 'Product development, acquisition experiments, operations, and compliance.', 'key_activities': 'Customer discovery, MVP delivery, measurement, and iteration.', 'revenue_streams': 'The business earns revenue by selling tea to customers. Revenue is generated from each tea sale, with total income depending on the number of units sold and the selling price.', 'customer_segments': 'elders', 'value_proposition': 'solve the entarinment', 'customer_relationships': 'Start with high-touch onboarding, then standardize support.'}

Market Analysis

{'market_size': 'No market-size estimate is stated without sourced external data.', 'market_demand': 'Validate demand with target customers; the submitted problem indicates a potential unmet need.', 'industry_trends': 'Investigate Other trends and regulations relevant to Sri Lanka.', 'growth_potential': 'Growth depends on repeatable acquisition, retention, and sustainable unit economics.'}

Risk Analysis

{'note': 'Risk level reflects the completeness of documented risk context, not a legal or financial risk opinion.', 'level': 'high', 'risk_resilience_score': 45.0}

Roadmap

[{'phase': 'Research', 'outcome': 'Validated problem evidence', 'milestone': 'Interview target customers.'}, {'phase': 'MVP', 'outcome': 'Demand signal', 'milestone': 'Build the smallest testable solution.'}, {'phase': 'Testing', 'outcome': 'Evidence-led iteration', 'milestone': 'Measure activation and willingness to pay.'}, {'phase': 'Launch',

'outcome': 'Early traction', 'milestone': 'Define repeatable go-to-market.'}, {'phase': 'Growth', 'outcome': 'Sustainable plan', 'milestone': 'Improve unit economics and delivery.'}]

Recommendations

[{'metric': 'market_opportunity', 'priority': 'high', 'recommendation': 'Add customer counts, market context, or interview evidence.'}, {'metric': 'innovation', 'priority': 'medium', 'recommendation': 'State the unique advantage versus current alternatives.'}, {'metric': 'investment_readiness', 'priority': 'medium', 'recommendation': 'Validate demand, document traction, and prepare basic unit economics.'}]
