Startup Evaluation Report

Tea House

Overall Confidence Score: 36.73/100

Executive Summary

This report presents a deterministic, explainable evaluation based on the submitted startup information. It is a decision-support tool, not a prediction of business success.

Confidence Scores

Metric	Score	Reasoning
Business Model	31.00	Scores how clearly value delivery and revenue capture are described.
Financial Feasibility	79.00	Scores the presence of budget and revenue assumptions, not projected profitability.
Innovation	30.00	Scores solution specificity and explicitly stated differentiation.
Investment Readiness	32.00	Scores evidence readiness for an investor conversation, not funding eligibility.
Market Opportunity	20.00	Scores clarity of the customer segment and problem evidence; it does not estimate external market size.
Risk Resilience	45.00	Scores whether known risks and competitive context have been considered.
Scalability	35.00	Scores stated repeatability, digital leverage, and execution maturity.
Technical Feasibility	31.00	Scores current validation stage and solution implementation detail.

SWOT Analysis

{ 'strengths': ['Clearly stated customer problem.', 'Defined target audience.'], 'weaknesses': ['Submitted assumptions require customer validation.'], 'opportunities': ['Test demand within Commerce in Sri Lanka.'], 'threats': ['Customers may continue using known alternatives.']}

Business Model Canvas

{ 'value_proposition': 'make tea shop', 'customer_segments': 'elders', 'channels': 'Validate acquisition channels through experiments.', 'customer_relationships': 'Start with high-touch onboarding, then standardize support.', 'revenue_streams': 'Tea and snack sales at each gathering.', 'key_resources': 'Customer insight, product capability, and domain knowledge.', 'key_activities': 'Customer discovery, MVP delivery, measurement, and iteration.', 'key_partners': 'Distribution partners, domain experts, and technology providers.', 'cost_structure': 'Product development, acquisition experiments, operations, and compliance.'}

Market Analysis

{ 'market_demand': 'Validate demand with target customers; the submitted problem indicates a potential unmet need.', 'market_size': 'No market-size estimate is stated without sourced external data.', 'industry_trends': 'Investigate Commerce trends and regulations relevant to Sri Lanka.', 'growth_potential': 'Growth depends on repeatable acquisition, retention, and sustainable unit economics.'}

Risk Analysis

{ 'risk_resilience_score': 45.0, 'level': 'high', 'note': 'Risk level reflects the completeness of documented risk context, not a legal or financial risk opinion.'}

Roadmap

{ { 'phase': 'Research', 'milestone': 'Interview target customers.', 'outcome': 'Validated problem evidence' }, { 'phase': 'MVP', 'milestone': 'Build the smallest testable solution.', 'outcome': 'Demand signal' }, { 'phase': 'Testing', 'milestone': 'Measure activation and willingness to pay.', 'outcome': 'Evidence-led iteration' }, { 'phase': 'Launch', 'milestone': 'Define repeatable go-to-market.', 'outcome': 'Early traction' }, { 'phase': 'Growth', 'milestone': 'Improve' } }

unit economics and delivery.', 'outcome': 'Sustainable plan']]

Recommendations

[{'priority': 'high', 'metric': 'market_opportunity', 'recommendation': 'Add customer counts, market context, or interview evidence.'}, {'priority': 'medium', 'metric': 'innovation', 'recommendation': 'State the unique advantage versus current alternatives.'}, {'priority': 'medium', 'metric': 'business_model', 'recommendation': 'Specify pricing, buyer, and payment frequency.'}]
